

Become A Super Student

The most important thing you can learn in school is how to learn. If you master that, you are on the road to success in school and in life. The Learning Success Center, through its Super Student Program, offers you a powerful way to develop your study and learning skills. Here's what the program offers:

- **Personal plan based on your needs.** We will interview you to get to know your needs in all areas related to academic success. And we'll set appropriate goals with you for gaining the learning skills you need.
- **Frequent consultations with a Learning Specialist.** Our Learning Specialists are trained in helping you to develop skills in managing your time, reading textbooks, taking notes, concentrating and memorizing, and succeeding on tests. They can also help you understand your individual "learning style," and how to use it to advantage. Your Learning Specialist will counsel you and point you toward additional useful resources, including Student Success Seminars and a host of software programs in our computer lab. They will give you custom-designed tasks and monitor your progress.
- **Personal oversight of your progress** provided by our Learning Services Coordinator.
- **Certification of your accomplishments.** At the conclusion of your one-term participation in the Super Student program, the Learning Services Coordinator will offer you a statement certifying the progress we've observed in your understanding of and application of effective learning skills.

Students who participate in the program should be prepared to attend an intake and exit interview with the Learning Services Coordinator, as well as at least three scheduled sessions with a Learning Specialist—a minimum of 4 ½ hours total time.

Be sure to talk to your teachers about receiving "extra-credit" for participating in the program. Participation may also strengthen your resume and talking points in a future job interview.

Acceptance into the program may depend on staff availability. **For more information**, contact: Lawrence Gilius, Learning Services Coordinator at (503) 491-7507 or via email at Lawrence.Gilius@mhcc.edu. See also: www.mhcc.edu/lsc
